What is HAderm?

HAderm is made of non-animal and biofermentative origin. It offers a complete solution for treating facial lines, wrinkles, and lips. It can also be used in facial sculpting by enhancing natural facial contours and features. There are three types of products can be chosen, HAderm Derm, HAderm Deep, HAderm Subskin. This three products make it possible to quickly and effectively meet the vast majority of patient's needs for correction and augmentation of wrinkle and folds.

Hyaluronic acid is a polysaccharide and is one of very few substances that is identical in all species and tissue types. Hyaluronic acid also exists naturally in our bodies and its most important function is to carry and bind water. It plays an important role giving volume to the skin, shape to the eyes and elasticity to the joints. It can be found in the eyes, tendons, articulations, and above all in the dermis of the skin.

The local depression, soft tissue filler, also can be used in rhinoplasty.

Why choose us?

Safety

It is safe due to non-animal origin and low BDDE residual, does not cause any negative impact on the skin. It can be well biodegraded in the skin.

Injection

Smooth extrusion force enables doctors to control the injections easily throughout the procedure.

Effect

It is long-lasting caused by slow and uniform degradation. A touch up treatment after a year needs the half of the product.

Service

We can provide professional technical support and personalized customized products.
